

Serial No. 10/821,588Docket No.: 55476US041**Amendments to the Specification**

Amend the paragraph at page 1, lines 7-8 as shown below in marked form:

This application is a divisional of U.S. Serial No. 09/757,955, filed January 10, 2001, now allowed U.S. Patent No. 6,737,113 B2, the disclosure of which is herein incorporated by reference.

Amend the paragraph at page 20, lines 15-17 as shown below in marked form:

If the spraying deposition rate is large enough to produce a continuous coating, the statistical nature of spraying will produce non-uniformities in the coating caliper. Here too, the use of rolls or other selected periodic pick-and-place devices can improve coating uniformity.
